**REMARKS**

**STATEMENT OF SUBSTANCE OF EXAMINER INTERVIEW OF JAN. 29, 2004**

In the interview of January 29, 2004, the disclosures of the prior art references of Koma, U.S. Patent No. 6,188,456 and Chigrinov, U.S. Patent No. 5,784,139 were discussed, in particular with reference to the lack of disclosure of the aspects of the invention, as described and claimed, including but not limited to: no pre-tilt inducing mechanism and no director orientation in a voltage applied state, and no preferred field-applied tilt direction; first and second polarizers of a first handedness in a generally on-axis embodiment; and a first circular polarizer of a first handedness and a second circular polarizer of a second handedness in a generally off-axis embodiment. The Examiner agreed to consider patentability of these and other aspects of the invention as now claimed subject to any requirement for additional searching and request for continued examination.
